

Cuff for Master-VAC EL

An electroconductive PE coupling sleeve (cuff) for joining and extending Master-VAC EL suction hose. Conductive material safely dissipates electrostatic charge, making it suitable for use in ATEX potentially explosive atmospheres.

Polyethylene

Electrically conductive

0 to +70 °C

CONSTRUCTION & MATERIALS

- design of the cuff: made of electrically conductive material
- material of the cuff: polyethylene
- material specification of the cuff: surface resistance $R_0 < 10^6 \text{ Ohm}$

PROPERTIES

- Chemical Properties: odourless and tasteless
- good resistance to chemicals
- stainless
- Other: easy to assemble

TEMPERATURE

- Temperature Range: 0 to 70 °C

VARIANT SPECIFICATIONS

4 sizes · 25–50 mm

Order code	Hose Ø DN (mm)	Fits hose O.D. (mm)
6.51E-23	25	—
6.51E-30	32	37.5–38.5
6.51E-36	38	44.5–45.75
6.51E-48	50	57–58.5

Order using the code shown. Made to order — see flex-appeal.co.uk for current stock and lead times.
